## Job Match

The most valuable feature of ProfileXT® is its job match function. This refers to the ProfileXT's ability to analyze a person's job-related attributes and compare them to the qualities required to perform successfully in a particular job.

### Customized Job Match patterns for:

- Your company
- Your specific needs
- Your location
- Your management style
- Your department
- Your corporate culture

**Now you will know why some of your people perform at extraordinary levels while others, who appear to be equally qualified, are only average performers.**

Job match patterns assure job fit. You can easily identify the people who fit the positions you are filling. You will promote and hire people who meet and exceed your expectations. Your customized job match patterns will also help you design training programs that produce the performance results you want.

ProfileXT is self-administered and is completed online, so it is available anywhere at any time. ProfileXT gives you several easy-to-use and informative reports that serve a variety of management needs. Get the information you want when you want it. ProfileXT requires no interpretation.

*Harvard Business Review* published the results of a study of 360,000 employed people. The study's goal was to evaluate the effectiveness and validity of traditional hiring practices.

The study revealed— Men and women performed at the same level. A person's age had nothing to do with their ability to perform. Ethnic background had no bearing on their job performance.

**“It is not experience that counts, or college degrees or other accepted factors – success hinges on fit with the job.”**
